## Dispelling the Myths about E-Learning

E-learning assists in delivering holistic assessment for course

### The LEARNING & ASSESSMENT Process

E-LEARNING	PLANNING	FACE-TO-FACE	ON-JOB-TRAINING
<p>The e-learning is a web-based learning system used to either build upon, validate or give students the knowledge base required for the required unit of competency.</p> <p>If your course has Government Funding associated with it, there is a requirement for outcomes to be <b>REPORTED</b> to the Government on a monthly basis. Outcomes are flagged when you receive an Email of competency after passing exams within the system</p>	<p>Students may be requested to prepare and plan a trip for their activity. This process gives the students the opportunity to put their knowledge base gained from the e-learning into practice. These plans are then reviewed by our assessors and discussed face-to-face.</p> <p>Validation Logs are another method used to gauge the level of experience of students.</p>	<p>The face-to-face training is to provide training and/or assessment for each of the practical elements of your selected activity.</p> <p><b>Despite the myth –</b> Adventurous activities such as abseiling, rock climbing, canoeing, navigation etc <b>CANNOT</b> be learnt by reading about it, they must be completed face-to-face.</p>	<p>You should ensure that you maintain your level of competency via on-the-job application of learnt skills (either paid or volunteered)</p> <p>If your course is part of a Government Funded traineeship or apprenticeship, the assessment process will include employment-based on-the-job training, employer feedback and other work place scenarios.</p>

### All of the above must be completed holistically National Qualifications must be Commercial not Institutional

CREDIT TRANSFER RPL Recognition of Prior Learning	REPORTING to GOVERNMENT Departments	COMMERCIAL Vs INDUSTRIAL	EMPLOYABILITY SKILLS
<p>Evidence of your skills and knowledge may take a variety of forms but you must ensure that it is: <b>Authentic, Valid, Reliable, Current &amp; Sufficient</b></p> <p>Evidence must demonstrate your competency, try to think how this can be proven! Your word is the weakest form of evidence.</p>	<p>The <b>Federal and State Governments</b> provide funding for training for apprenticeships, traineeships, Productivity Placement Programs etc,</p> <p>The <b>continuation</b> of this funding is reliant on enrolled students demonstrating commitment to the courses, this can be achieved by <b>students completing E-learning</b> units in a timely manner.</p>	<p>The course is a <b>nationally recognised</b> course.</p> <p>This means the qualification you will receive is recognised <b>Australia-wide</b>.</p> <p>Therefore you will need to demonstrate the competencies in a range of environments not just within your own workplace, campsite, volunteer group etc</p>	<p>Employability skills are defined as skills required not only to gain employment, but also to progress so as to achieve one's <b>potential</b>. They are skills that apply across a variety of jobs and life contexts.</p> <p>There <b>are eight skills</b>: communication, teamwork, problem solving, initiative and enterprise, planning and organising, self-management, learning, and technology.</p>
